## DETAILED ACTION

### *Terminal Disclaimer*

1. The terminal disclaimer filed on 2/4/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,641,433 has been reviewed and is accepted. The terminal disclaimer has been recorded.
2. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest an adapter system as recited in new claims 29-30. Specifically that of an adapter system comprising first and second pluralities of contacts electrically coupled to respective conductors with one of the first contacts, and one of the second contacts coupling communications signals between one of a local source and a remote destination, and another of the second contacts coupling electrical energy from a remote source to a local destination with the mechanical configuration of the first plurality of contacts comprising a plug configuration matable with one of a plurality of existing interconnected sockets and with the mechanical configuration of the second plurality of contacts comprising a socket configuration matable with a plug of a local electrical unit where the plug of the electrical unit is not matable with the existing socket such that the conductors in the housing couple electrical energy in one direction to the socket of the housing and couple communication signals bidirectionally between the plug and socket thereof.
